

TRACES

Therapeutic Foster Care

Tennessee Regional Alternative Care Environments (TRACES) serves children and teens (0-18 years of age) who are in state's custody due to abuse or neglect and who have behavioral and/or emotional problems. TRACES foster parents make a difference in a child's life by providing a warm and loving home where physical, emotional, and social needs are met. TRACES needs foster parents who believe, as we do that every child deserves a chance to learn and grow in a loving family.

**TRACES parents are an important part of our team.
TRACES offers support to our parents including:**

- 24 hour on call support
- Financial support
- Outstanding support by case managers
- Free pre-service training
- Ongoing training

Adoption Services

TRACES is dedicated to finding and approving foster families who are open to the possibility of adoption. In addition to finding homes for children in state's custody, we do private home studies for domestic and international adoptions. As an adoptive family you could provide a permanent, safe, and loving environment where a child can grow emotionally and spiritually in a secure place they call home.
